

Model: XB-150

Analytical Probe Station

- » The Probe Station **XB-150** is a dedicated probing solution that comes with everything you need to achieve accurate measurement results in the shortest time, with maximum confidence. The system Provides best known methods for I-V/C-V measurements.

Designed for upgradability and extendable with multiple options.

The Probe Station **XB-150** can be easily reconfigured to meet your future project requirements, such as RF testing and high voltage testing .

» **Accessories**

Microscope Magnification : 1000X
Hot Chuck : 200/300/400°C
Special Chuck Design for RF
CCD and Screen
Micropositioner
Tip Holder
Shielding Box
Vibration Free Table

» **Specifications**

Vacuum Chuck 6"
Coaxial-Driven Chuck Stage
Chuck stage 6"x6" Travel
Chuck Theta 0°~30°
Chuck Up/Down 4mm Adjustable
Microscope Stage 2"x2" Travel
580mmW x 460mmD x 700mmH With Microscope
Weight 60kg with microscope
